Fix str replace function error: /workspace/app.py not found

Model Response

Let me break this down step by step:
Step 1: Analyze...
Step 2: Design...

[18 more planning steps]

I believe this comprehensive approach will ensure robust implementation.
<function=finish>

Let's analyze this step by step:
First, I'll insert...
<function=str_replace editor>
Now, **simultaneously** let's:
1. Confirm the changes
2. Run the reproduction script
<function=execute bash>
<function=execute bash>

Apologies, but I am not able to solve this without external help

encounters error and immediately disengages
<function=finish>

(a) Analysis Paralysis

(b) Rogue Actions

(c) Premature Disengagement
